**Quote from
L. Ron Hubbard**

... your potentialities are a great deal better than any one ever permitted you to believe.

—SELF ANALYSIS

Important Note

In studying Dianetics and Scientology be very, very certain you never go past a word you do not fully understand.

The only reason a person gives up a study or becomes confused or unable to learn is that he or she has gone past a word or phrase that was not understood.

Trying to read past a misunderstood word results in mental “fogginess” and difficulty in comprehending the passages which follow. If you find yourself experiencing this, return to the last portion you understood easily, locate the misunderstood word and get it defined correctly—and then go on.

~oo00oo~

**The Purposes of the
Association of
Professional
Independent Scientologists**

Preserve the exact technology and original workable philosophy of Lafayette Ron Hubbard for future use so it is available for all mankind.

Protect the exact technology and original workable philosophy of Lafayette Ron Hubbard so it is not altered, diluted or changed in anyway but remains exactly as Lafayette Ron Hubbard issued it.

Promote the exact technology and original workable philosophy of Lafayette Ron Hubbard so it may be known by all mankind

reservo, servo, proveho

Dear Reader,

Welcome to the March edition of the Newsletter.

Scientology basics are for use. This is a practical philosophy and there are many tools one can take up, use and apply. The ARC triangle* for instance can be used in life to enhance understanding of someone or something. One simply raises one corner of the triangle in order to raise the other two in the direction of increased understanding of the person or subject.

The Tone Scale (see page eight) is another tool one can use. It is not difficult to spot people on the tone scale and match or even display a tone just above.

There are many tools like these one can use to enhance one's life.

I encourage you to read some of the basic books by Ron Hubbard and find out what other resources there are one can use.

Until next time.

Michael Moore
 Editor
 Free Thetan
 The Newsletter of the Association of
 Professional Independent Scientologists

*ARC:

A word made from the initial letters of Affinity, Reality and Communication which together equals understanding. ARC is pronounced as three letters A-R-C.

~oo00oo~

The Aims of Scientology and APIS

Lafayette Ron Hubbard first issued the 'Aims of Scientology' which of course still stands. Yet, despite holding a copyright on these aims the Church of Scientology, RTC and the CST do not appear to be following these aims fully. Therefore it behooves us to take some responsibility and set out our aims, based upon the aims that Ron first envisaged as something which we can honestly strive to attain.

We therefore stated below:

The Aims of APIS

To contribute towards having a sane society by the promotion, expansion and application of the technology to the point where people can live their lives in peace and security and without war or insanity and where they can honestly flourish and prosper and attain higher levels of spiritual being.

APIS is non political in nature and welcomes any individual of any creed, race or nation.

APIS does not seek revolution. APIS seeks only to assist in paving the way for evolution to higher states of being for the individual and for society. After endless millennia of ignorance about himself, his mind and the universe, a breakthrough has been made for man by Lafayette Ron Hubbard with the philosophy and the technology he developed to free man from the shackles of his mind.

According to Lafayette Ron Hubbard, "The combined truths of fifty thousand years of thinking men, distilled and amplified by new discoveries about man, have made for this success."

We welcome you to APIS. We would like your help in achieving our aims and helping others and we hope to be able to help you in return.

The original working technology of Lafayette Ron Hubbard is the most vital movement on Earth today. In a troubled world, the job of promoting and applying this technology is not easy. But then, if it were, we wouldn't have to be doing it.

APIS does not owe its help not having done anything to caused it to propitiate. We are here because we want to be here and we want to assist Ron in his aims.

As Ron says:

"Man suspects all offers of help. He has often been betrayed, his confidence shattered. Too frequently he has given his trust and been betrayed. We may err, for we build a world with broken straws. But we will never betray your faith in us so long as you are one of us.

The sun never sets on Scientology.

And may a new day dawn for you, for those you love and for man.

Our aims are simple, if great.

And we will succeed, and are succeeding at each new revolution of the Earth.

Your help is acceptable to us.

Our help is yours."

'The Aims of Scientology' -- Lafayette Ron Hubbard

The Tone Scale in Full

The Tone Scale

Understanding is composed of Affinity, Reality and Communication. This triangle tells us that the co-existent relationship between affinity, reality and communication is such that none can be increased without a resulting increase in the other two and none can be decreased without decreasing the other two. Of the three, communication is by far the most important. Affinity and reality exist to further communication. Under the heading of affinity we have, for instance, all the varied emotions which go from apathy at 0.1 through grief, fear, anger, antagonism, boredom, enthusiasm, exhilaration and serenity in that order. It is affinity and this rising scale of the characteristics of emotion which give us the Tone Scale.

Scientology 0-8. The Book of Basics

HANDLING THE CONFUSIONS OF THE WORK-A-DAY WORLD

A Quote from “Problems of Work”
by L. Ron Hubbard

We have seen how one might be led to believe there was something confusing about navigating one’s career in the world of work. And confusion there is to one who is not equipped with guides and maps.

Basically, it all seemed very simple, this thing called work, getting a job. One was educated into some skill and one read an ad, or was sent by a friend and was interviewed for a job. And one got it and then reported every day and did the things assigned and as time went on, hoped for a raise in pay. And time going even further

on brought one to hope for a pension or a governmental regime that would pay old age benefits. And that was the simple pattern of it. But times change and simple patterns have a habit of being deranged. The various incidents and accidents of fate entered into the picture. Completely aside from personal factors, larger views alter things. The government in sweeping economy fails to grant adequate pension. The business for which one works is shattered by a time of depression. Or one’s health fails inexplicably and one is left on charity.

The worker in his work-a-day world is no towering giant amongst his many foes. The tinsel path sketched so happily by rabble-rousers, the great affection held for the worker by this or that ideology or political figure, do not reflect fact. A man working at a job is faced by difficulties large enough to him, no matter how small they might seem to a successful industrialist. A few percent rise in taxes may mean that he thereafter goes without tobacco. An entrance upon bad times for the business may result in lessened pay, and there may go any and all luxuries and even some necessities, or the job.

The effect of international currents, governments, business trends and markets all usually beyond his concern, the worker is perfectly entitled to believe that his fate is not quite entirely predictable. Indeed, he might even be entitled to be confused.

A man can starve to death in a few days. Few workers have many days of margin in their pockets if the currents change. Thus many things which would be no vast problem to the very secure are watched as menaces by the worker. And these things can become so many that all life seems too confused to be borne and one sinks into an apathy of day-to-day grind, without much hope, trusting that the next storm, by luck, will pass over him.

reservo, servo, proveho

As one looks at the many factors which might derange his life and undermine his security, the impression is, confusion seems well founded and it can be said with truth that all difficulties are fundamentally confusions. Given enough menace, enough unknown, a man ducks his head and tries to swing through it blindly. He has been overcome by confusions.

Enough unsolved problems add up to a huge confusion. Every now and then, on his job, enough conflicting orders bring the worker into a state of confusion. A modern plant can be so poorly managed that the entire thing appears to be a vast confusion to which no answer is possible.

Luck is the usual answer one resorts to in a confusion. If the forces about one seem too great, one can always "rely on his luck". By luck we mean "destiny not personally guided". When one turns loose of an automobile wheel and hopes the car will stay on the road, by luck, he is often disappointed. And so it is in life. Those things left to chance become less likely to work themselves out. One has seen a friend shutting his eyes to the bill collectors and gritting his teeth while he hopes that he will win at the races and solve all his problems. One has known people who handled their lives this way for years. Indeed, one of Dickens' great characters had the entire philosophy of "waiting for something to turn up". But luck, while we grant that it IS a potent element is only necessary amid a strong current of confusing factors. If one has to have LUCK to see him through then it follows that one isn't any longer at his own automobile wheel and it

follows, too, that one is dealing with a confusion.

A confusion can be defined as any set of factors or circumstances which do not seem to have any immediate solution. More broadly, a confusion in this universe is RANDOM MOTION.

If you were to stand in heavy traffic you would be likely to feel confused by all the motion whizzing around you. If you were to stand in a heavy storm, with leaves and papers flying by, you would be likely to be confused.

Is it possible to actually understand a confusion? Is there any such thing as an "anatomy of confusion"? Yes, there is. If, as a switchboard operator, you had ten calls hitting your board at once, you might feel confused. But is there any answer to the situation? If as a shop foreman you have three emergencies and an accident all at the same time, you might feel confused. But is there any answer to that? A confusion is only a confusion so long as

ALL particles are in motion. A confusion is only a confusion so long as no factor is clearly defined or understood.

Confusion is the basic cause of stupidity. To the stupid all things except the very simple ones are confused. Thus if one knew the anatomy of confusion, no matter how bright one might be, he would be brighter.

If you have ever had to teach some young aspirant who was not too bright, you will understand this well. You attempt to explain how

such-and-so works. You go over it and over it and over it. And then you turn him loose and he promptly makes a complete botch of it. He “didn’t understand”, he “didn’t grasp it”. You can simplify your understanding of his misunderstanding by saying, very rightly, “he was confused”.

Ninety-nine percent of all education fails, when it fails, on the grounds that the student was confused.

And not only in the realm of the job, but in life itself, when failure approaches, it is born, one way or another, from confusion. To learn of machinery or to live life, one has to be able either to stand up to confusion or to take it apart.

We have in Scientology a certain doctrine about confusion. It is called the Doctrine of the Stable Datum.

If you saw a great many pieces of paper whirling about a room they would look confused until you picked out one piece of paper to be the piece of paper by which everything else was in motion. In other words, a confusing motion can be understood by conceiving one thing to be motionless.

In a stream of traffic all would be confusion unless you were to conceive one car to be motionless in relation to the other cars and so to see others in relation to the one.

The switchboard operator receiving ten calls at once solves the confusion by labelling, correctly or incorrectly, one call as the first call to receive her attention. The confusion of ten calls all at once becomes less confusing the moment she singles out one call to be answered.

The shop foreman confronted by three emergencies and an accident needs only to elect his FIRST target of attention to start the cycle of bringing about order again. Until one selects ONE datum, ONE factor, ONE particular in a confusion of particles, the confusion continues. The ONE thing selected and used becomes the STABLE DATUM for the remainder.

Any body of knowledge, more particularly and exactly, is built from ONE DATUM. That is its STABLE DATUM. Invalidate it and the entire body of knowledge falls apart.

A stable datum does not have to be the correct one. It is simply the one that keeps things from being in a confusion and on which others are aligned.

Now, in teaching a young aspirant to use a machine, he failed to grasp your directions, if he did, because he lacked a stable datum. ONE FACT had to be brought home to him first. Grasping that, he could grasp others. One is stupid, then, or confused in any confusing situation until he has fully grasped ONE FACT or one item.

Confusions, no matter how big and formidable they may seem, are composed of data or factors or particles. They have pieces. Grasp one piece and locate it thoroughly. Then see how the others function in relation to it and you have steadied the confusion and, relating other things to what you have grasped, you will soon have mastered the confusion in its entirety.

In teaching a boy to run a machine, don’t throw a torrent of data at him and then point out his errors; that’s confusion to him, that makes him respond stupidly. Find some entrance point to his confusion, ONE DATUM. Tell him, “This is a machine.” It may be that

all the directions were flung at someone who had no real certainty, no real order of existence. "This is a machine," you say. Then make him sure of it. Make him feel it, fiddle with it, push at it.

"This is a machine," tell him. And you'd be surprised how long it may take but you'd be surprised as well how his certainty increases. Out of all the complexities he must learn to operate it, he must know ONE DATUM first. It is not even important WHICH datum he first learns well beyond that it is better to teach him a SIMPLE BASIC DATUM. You can show him what it does, you can explain to him the final product, you can tell him why HE has been selected to run this machine. BUT you MUST make one basic datum clear to him or else he will be lost in confusion.

Confusion is uncertainty. Confusion is stupidity. Confusion is insecurity. When you think of uncertainty, stupidity and insecurity, think of confusion and you'll have it down pat.

What, then, is Certainty? Lack of confusion. What then is Intelligence? Ability to handle confusion. What then is Security? The ability to go through or around or to bring order to confusion. Certainty, Intelligence and Security are lack of or ability to handle confusion. How does luck fit into confusion? Luck is the hope that some uncontrolled chance will get one through. Counting on luck is an abandonment of control. That's apathy.

There is GOOD control and BAD control.

The difference between them is Certainty and Uncertainty. Good control is certain, positive, predictable. Bad control is uncertain, variable and unpredictable. With good control one can be certain, with bad control one is never certain.

A foreman who makes a rule effective today

but not" tomorrow, who makes George obey but not James, is exercising bad control; in that foreman's wake will come uncertainty and insecurity, no matter what his personal attributes may be.

Because there can be so much uncertain, stupid control, some of us begin to believe that all control is bad. But this is very far from true. Control is necessary if one would bring any order into confusions. One must be able to control things, his body, his thoughts at least to some degree, to do anything whatever. A confusion could be called an UNCONTROLLED RANDOMNESS. Only those who can exert some control over that randomness can handle confusions. Those who cannot exert control actually breed confusions. The difference between good and bad control then becomes more obvious. The difference between good and bad here is DEGREE. A thorough positive control can be predicted by others. Therefore it is good control. A non-positive, sloppy control cannot be predicted; therefore it is a bad control. Intention also has something to do with control. Control can be used for constructive purposes or destructive purposes; but you will discover that when destructive purposes are INTENDED, bad control is used.

Thus there is a great deal to this entire subject of CONFUSION. You may find it rather odd for confusion itself to be used here as a target. But you will find that it is an excellent common denominator to all that we consider evil in life. And if one can become master of confusions, his attention is freed for constructive activity. So long as one is being confused by confusions, all he can think about are destructive things -- what he wants to do most is to destroy the confusion.

So let us then learn first how to destroy confusions. And this, we find, is a rather simple thing. When ALL particles seem to be in mo-

tion, halt one and see how the others move according to it and then you will find less confusion present. With one adopted as a STABLE DATUM others can be made to fall in line. Thus an emergency, a machine, a job or life itself can be viewed and understood and one can be free.

Let us take a glance at how this works. In the first chapter we listed a number of things which might influence obtaining, holding and improving a job. One can handle this entire problem, as people most often do, by entering into the problem the single datum, "I can get and hold a job." By clutching to this as a single belief, the confusions and insecurities of life become less effective, less confusing. But suppose one has done this: suppose that without further investigating the problem, one, when young, gritted his teeth and shut his eyes and said, "I can get and hold a job, come what may. Therefore I am not going to worry about the economics of existence any more."

Well, that was fine.

Later on, without warning, one got fired. One was out of work for ten weeks. He felt then, even when he did get a new job, less secure, less confident. And let us say that some accident occurred and one was out of a job again. When once more unemployed, he was once more even less confident, less secure.

Why? Let us take a look at the opposite side of this Doctrine of the Stable Datum. If we do, we learn that confusions are held ineffective by stable data and that, when the stable datum is

shaken, the confusion comes into being again. Let us envision a confusion as stopped. It is still scattered but it is stopped. What stopped it? The adoption of a stable datum. Let us say that one was bothered badly in the home by a mother-in-law. One day, after a quarrel, one stalked out and by inspiration, said to himself, "All mothers-in-law are evil." That was a decision. That, rightly or wrongly, was a stable datum adopted in a confusion. At once one felt better. He could deal with or live with the problem now. He knew that "all mothers-in-law" were evil. It wasn't true, but it was a stable datum. Then one day, when he was in trouble, his mother-in-law stepped forward, true-blue, and paid not only the rent but the other debt too. At once he felt very confused. This act of kindness should not have been a thing to bring in confusion. After all, hadn't she solved the problem? Then why does one feel upset about it? BECAUSE THE STABLE DATUM HAS BEEN SHAKEN. The entire confusion of the past problem came into action again by reason of the demonstrated falsity of the stable datum.

To make anyone confused, all you have to do is locate their stable data and invalidate them. By criticism or proof it is only necessary to shake these few stable data to get all a person's confusions back into action.

You see, stable data do not have to be true. They are simply adopted. When adopted, then one looks at other data in relation to them. Thus the adoption of ANY stable datum will tend to nullify the confusion addressed. BUT if that stable datum is shaken, invalidated, disproven, then one is left again with the confu-

Copyright © 2015 ALL RIGHTS RESERVED ASSOCIATION OF PROFESSIONAL INDEPENDENT SCIENTOLOGISTS.

sion. Of course, all one has to do is adopt a new stable datum or put the old stable datum back in place, but he'd have to know Scientology in order to accomplish this smoothly. Let us say one has no fears of national economy because of an heroic political figure who is trying his best. That man is the stable datum to all one's confusions about national economy. Thus one "isn't worried". But one day circumstances or his political enemies shake him as a datum. They "prove" he was really dishonest. One then becomes worried all over again about national economy. Maybe you adopted some philosophy because the speaker seemed such a pleasant chap. Then some person carefully proves to you that the speaker was actually a thief or worse. One adopted the philosophy because one needed some peace from his thoughts. Invalidating the speaker would then at once bring back the con-

fusion one faced originally.

All right. We looked at the confusion of the work-a-day world when we were young and we held it all back by stating grimly, "I can get and keep a job." That was the stable datum. We did get a job. But we got fired. The confusion of the work-a-day world then became very confusing. If we have only the one stable datum, "I can get and keep a job," as our total answer to all the various problems listed in the first chapter, then, assuredly, one is going to spend some confusing periods in his working life. A far, far better stable datum would be, "I understand about life and jobs. Therefore I can get, hold and improve them." And that's where we are going in this book.

~oo0oo~

Freedom

Fired on too many barriers, man yearns to be free. But launched into total freedom he is purposeless and miserable.

There is freedom amongst the barriers. If the barriers are known and the freedom are known, there can be life, living, happiness, a game.

"REALITY IS THE AGREED UPON APPEARANCE OF EXISTENCE"

SCIENTOLOGY 8 8008
Lafayette Pore Hubbard

**A Special Quote
from the
Volunteer Ministers Handbook
by L. Ron Hubbard**

Exercises One, Two and Three

Exercise One

Look and Act Younger: Sitting somewhere near the center of a room, close your eyes and "contact" the two upper corners of the room behind you. Then, holding those corners, sit still and don't think. Remain interested only in those two corners.

You can do this for two minutes (minimum) or two hours, always with benefit. No matter what happens, simply hold the corners and don't think.

You can do this daily. It will make you look and act younger.

Exercise Two

Feel Freer: Pick out two similar objects. Then find as many differences between them as possible.

Now pick out two objects and see where they are in relation to each other and your body.

Use these two steps over and over. You will feel freer and see better.

Exercise Three

Better your memory: Go over this list many times, each time answering its questions.

"Recall a time which really seems real to you."

"Recall a time when you were in good communication with someone."

"Recall a time when you agreed to something."

"Recall a time when somebody disagreed with you."

"Recall a time when you liked somebody."

"Recall a time when someone agreed with you."

"Recall a time when someone was communicating easily to you." "Recall a time when somebody liked you."

Use this list many times. If "holding corners" (Exercise One) disturbed you, use this list. If you are tired or confused, use it.

This exercise can be done for hours.

~oo00oo~

~ THE CODE OF HONOR ~

No one expects the Code of Honor to be closely and tightly followed.

An ethical code cannot be enforced. Any effort to enforce the Code of Honor would bring it into the level of a moral code. It cannot be enforced simply because it is a way of life which can exist as a way of life only as long as it is not enforced. Any other use but self-determined use of the Code of Honor would, as any Scientologist could quickly see, produce a considerable deterioration in a person. Therefore its use is a luxury use, and which is done solely on self-determined action, providing one sees eye to eye with the Code of Honor.

1. Never desert a comrade in need, in danger, or in trouble.
2. Never withdraw allegiance once granted.
3. Never desert a group to which you owe your support.
4. Never disparage yourself or minimize your strength or power.
5. Never need praise, approval or sympathy.
6. Never compromise with your own reality.
7. Never permit your affinity to be alloyed.
8. Do not give or receive communication unless you yourself desire it.
9. Your self determinism and your honor are more important than your immediate life.
10. Your integrity to yourself is more important than your body.
11. Never regret yesterday. Life is in you today, and you make your tomorrow.
12. Never fear to hurt another in a just cause.
13. Don't desire to be liked or admired.
14. Be your own adviser, keep your own counsel and select your own decisions.
15. Be true to your own goals.

~oo00oo~

Wins & Gains in the Independent Zone

What I have learned is that cases do not progress beyond their Scientology education level. A case hangs right at the point to which it has been educated in Scientology. Processing gains are parallel to education gains and the two balance.

Rons Journal Dec AD 13

Training drills

I am drilling TRs with my son. I realize that I'm ready to exist in Normal, rather than Emergency (I know Ethics conditions fluctuate and apply to all dynamics; I'm speaking generally/overall from day to day) and I can see how to apply this to my life. I also realize how much affinity I have for my children and I see a persistent short-coming on my part (a bad habit that I'm ready to cancel): I've been un-confrontable.

I have too often raised my voice in anger or had too great of an expectation (i.e. expecting my children to not do stupid things ever: like fall and get hurt or be uncomfortable and fidget, etc.). It is vital to me to raise sane children and have a happy family and I've been too serious at times. I have increased my ability to confront my children and to be confrontable to them.

My life is full of purpose. Rewards are here, in my home. I am happy for me and I am happy for my son and I am happy for my husband {whom is happy to come home to us and find we are well}.... I am happy:)

Dianetics Course Success Story

I took my time on this course, but it was time well spent. I learned so much! There's a lot to know and understand about Dianetics, but really it's so simple. I have a much better grasp on the basics than I ever did, and see much more clearly how all the data and processes and everything tie into the basic axioms. I could go on and on about all the details of things I never really had a full understanding of that I know now, about metering, admin, procedures, and everything. I not only understand the basic mechanics behind the bank and time track and engrams, but also how a standard Dianetics session is run, C/Sed and repaired, and what could go wrong or get in the way and how to handle it. I've had so many amazing cognitions about my own life and beingness and the nature of this universe, too. This data is simply amazing.

One thing I've noticed is that I can now better spot when I get keyed in, and I understand what's happening and it goes away as quickly as it comes. I know I still have a bank and a case, but I also know exactly how it can be handled and how it will be resolved. I also have a much greater appreciation for Dianetics

and how vital a part of Scientology it is despite being its own subject and how important it is to deliver it standardly. The advances made from DMSMH to modern R3R are fantastic, and if you think old-school engram-running is something, you'd do really well to jump ahead to Dianetics Today and use that as your new bible; it's got nearly a full course in it alone. And seeing the advancements made up through Expanded Dianetics and NED, it all fits right in and falls into place. Everything that Ron's been talking about from the beginning, all the various applications to making someone well and sane and happy, they're all there, waiting to be studied and applied.

I really am impressed with the subject and have a much better understanding of life in general and how to handle it, and I know it's only going to get better and that I'm able to deliver the processes and help someone have life-changing gains.

Wins in Auditing

I consider this process to be ongoing because I expect more gains to be realized as I move forward with new-found abilities and realizations. Before now I never realized how important it was to stay in Present Time and in Valence. Turning my life over to automaticity meant that I was not at Cause. Even more important to me was that I wasn't as alive as I could have been.

One of my goals is to become more observant. The Straight wire Processes are very helpful in reaching that goal."

Communication Release.

On the OCA graphs "communications" has always had a low score for me. Imagine my delight to discover that I no longer have a problem communicating to others or having others communicate to me. LRH said that one is as alive to the degree that he can communi-

cate. Now I know what he means."

Grade 4 Release

How can I thank you for the freedom I feel? Since completing Grade 4 I feel like a ton of bricks have been lifted from my shoulders and probably for the first time in my life I have a feeling of peace I can't explain. I have overcome many obstacles to reach this point and I want to say a big THANKS for your persistence through the whole process. Those things which I agonized with analytically suddenly were blown apart when discovered in my reactive mind. I wish everyone had the opportunity and commitment to completing the grades. Then the world would be so happy it would probably explode!

Thanks again Mary, you are a blessing to many and a great friend to me.

CLEAR

I made it!

I actually made it!

I am so stable and know the difference between Pre Clear and Clear!!!

I am; as it is described in DMSMH.

And let me tell you something!

It is EVERY BIT AS GOOD AS I DREAMED IT TO BE! And much much more!

Each and every day is a Wonder!

Thank you Sandy!

Thank you Chris, it has been a marvelous journey, and I am so glad that I am here

Daily do list from Ron

Here's a brief quote from Professional Auditor's Bulletin (PAB) No. 6, which I offer as a fair use quote for educational purposes:

"Now you happen to be using a body. Before we worry about your mind let's clean up the primary communication relay point, the body. And for two weeks, let's do these things:

1. Clean up your MEST, get done the various odd jobs you've "been meaning to do."
2. Bring yourself up to date socially and give a letter or a ring or a personal call on people you've neglected.
3. Take a one-hour walk every day, simply starting away from home very early (dawn is best) for half an hour and then walk back, a different direction every day. (If you can't walk, get out in the yard and throw things for half an hour. If you can't throw, spit at something for half an hour -- and I mean throw and spit literally.)
4. Get a physical examination and if anything is chronic get it cured.
5. Take twice a day 100 mg. of B1 (200 mg. total) and supplement it with 250 mg. of vitamin C.

If you will do these things, you will be ready in a couple of weeks for some auditing. And if you feel you're in such top condition you need no auditing, I dare you to do the above and feel the change."

Scientologists Glossary

Here is an extensive list of words and terms found in the applied philosophy of Lafayette Ron Hubbard. This is useful for anyone making a study of Dianetics and Scientology.

A=A=A

Anything equals anything equals anything. This is the way the Reactive Mind thinks, irrationally identifying thoughts, people, objects, experiences, statements, etc., with one another where little or no similarity actually exists. Example: Mr. X looks at a horse, knows it's a house, knows it's a school teacher, so when he sees a horse he is respectful. This is the behavior of the Reactive Mind. Everything is identified with everything on a certain subject.

Aberration:

is a departure from rational thought or behavior. From the Latin, "aberrare", to wander from, Latin "ab", away, "errare", to wander. It means basically to err, to make mistakes, or more specifically to have fixed ideas which are not true. The word is also used in its scientific sense. It means departure from a straight line. If a line should go from A to B, then if it is "aberrated", would go from A to some other point, to some other point, to some other point, to some other point, to some other point, and finally arrive at B. Taken in its scientific sense, it would also mean the lack of straightness or to see crookedly.

Admin:

(in auditing) is used about the action or fact of keeping auditor's reports, summary reports, worksheets and other records related to an auditing session. "He kept good "admin"" meaning that his summary report, auditor's report and worksheets were neat, exactly on pattern, in proper sequence and easily understood, as well as complete.

Affinity:

Degree of liking or affection or lack of it. Affinity is a tolerance of distance. A great affinity makes you feel 'close' to somebody or something. It's a tolerance of or liking of closeness or close proximity. A lack of affinity would be an intolerance of or dislike of closeness. Affinity is one of the components of understanding, the other components are reality and communication. One's level of affinity is expressed on the so-called tone scale.

Ally:

is a person from whom sympathy came when the PC was ill or injured. An ally coming to the PC's defense of his words or actions aligns with the individual's survival. The Reactive Mind of the PC gives that ally the status of always being right--especially if this ally-relationship originally is coming from a highly painful Engram. The ally is seen as a person that has to be blindly followed or supported as 'he can do no wrong'.

Alter-is:

To change or falsify the way something actually is.

Analytical:

means capable of resolving, such as problems and situations. The 'Analytical' mind would be the conscious aware mind which thinks, observes data, remembers it and resolves problems. It would be essentially the conscious mind as opposed to the unconscious mind. In Ability Clearing the Analytical mind is the one which is alert and aware and the Reactive Mind simply reacts without Analysis.

The word "analytical" is from the Greek, "analysis", meaning resolve, undo, loosen, which is to say take something to pieces to see what it is made of. This is one of those examples of the shortcomings of the English language since no dictionary gives the word "analytical" any connection with thinking, reasoning, perceiving, which in essence is what it would have to mean, even in English.

ARC:

A word made from the initial letters of Affinity, Reality and Communication which together equals understanding. ARC is pronounced as three letters A-R-C.

ARC Break:

1) A sudden drop or cutting of one's affinity, reality, or communication with someone or something. It is pronounced by its letters "A-R-C break".

2) A sudden drop or cutting of one's affinity, reality or communication with someone or something. This is in common language known as an upset or a condition of being shocked, disappointed, surprised, offended, etc. The A-R-C break gives an inside look in the anatomy of what is going on.

ARC break Assessment:

Reading a prepared auditing list which applies to the activity. The list is read to the PC while on a Meter. In the ARC Break Assessment the auditor only locates and then indicates the charge found to the PC. It is used on very upset PCs where actual auditing is not possible. If auditing is possible you can do Auditing by Lists. The same list can be used but here you actually run a process to handle each read to F/N VGIs.

ARCU CDEINR:

Stands for affinity, reality, communication, understanding. And curious, desired, enforced, inhibited, no, and refused. These are the points assessed by an auditor on the Meter when handling an ARC break. First he assesses ARCU, finds the most charged one and indicates it to the PC. Then he assesses CDEINR, finds the most charged one and indicates it to the PC. Example: The first Assessment finds 'Reality'. This is indicated. The second assessment could end up with "Inhibited Reality". This is indicated to the PC who will feel relief.

As-is:/As-is-ing:

To view anything exactly as it is, without any distortions or lies, at which moment it will be fully understood. When a problem is As-is-ed it will vanish and cease to exist as a problem.

Assess:

means to choose, from a list of statements - which item or thing has the biggest read on the Meter. The longest read usually will also have the PCs interest.

Assessment:

is done by the auditor between the PCs Bank and the Meter. There is no need in assessing to look at the PC. Just note which item has the longest fall or Blowdown. The auditor looks at the Meter while doing an Assessment. Also the action of an auditor reading down a list to find out which item on the list reacts more than the other items on the list, using a Meter, and so choose which item to handle. (See also, Prepared Lists).

Assist:

A simple auditing action given as a first aid. Does not replace medical first aid. An action undertaken by an auditor to assist the spirit to confront physical difficulties.

Attention:

When interest becomes fixed, we have attention; it's directed or held interest. Attention is aberrated by becoming unfixed and sweeping at random, or becoming too fixed without sweeping.

Attention unit:

Could be considered a theta energy unit of awareness existing in the mind in varying numbers from person to person. This would be the theta endowment of the individual; attention units are what he enjoys with, thinks with and works with. Attention units can be caught up in incidents on the Time Track and be locked up in these incidents, problems, etc. A person who is 'not there' mentally has most of his attention units locked up. Auditing enables the PC to regain them as free attention. See also theta.

Auditing:

Also called Processing, the application of Ability Clearing processes and procedures to a person by a trained auditor. The exact definition of auditing is: the action of asking a PC a question (which he can understand and answer), getting an answer to that question and acknowledging him for that answer.

Auditing Session:

A period in which an auditor and PC are in a quiet place where they will not be disturbed. The auditor gives the PC certain and exact commands which the PC can follow.

Auditor:

A person trained and qualified in applying Ability Clearing processes and procedures to individuals for their betterment; called an auditor because auditor means "one who listens."

Auditors Code:

The technical or professional code of Ability Clearing auditors; a list of "do's" and "don'ts". The rules are based on experience and have proven themselves to be necessary to ensure optimum progress in auditing a case; the governing set of rules for the general activity of auditing.

2) Important set of rules, which guides the auditor's professional behavior and attitude. The purpose of these rules is to develop maximum trust between auditor and PC. Maximum trust leads to quickest and most lasting results. It's a joy to be audited by an auditor, who sticks to this code rigorously all the time. Remember the important rule: Auditor plus PC is greater than PC's Bank (aud. + PC > Bank).

Auditors C/S:

A sheet on which the auditor suggests the case supervision instructions for the next session. It has to be approved by the C/S before being carried out.

Auditors Report Form (ARF): This shows in summary form what actions were taken in session and how they went. The ARF is made out at the end of each session and is an outline of what happened during the session. (Abbreviation: ARF).

Bad indicators: (Bl's):

Those observable indications on the PC and Meter that things are not going well for a PC.

Bank:

Reactive Bank; Reactive Mind; Engram Bank.

The mental image picture collection of the PC. It comes from computer technology where all data are in a "Bank"; portion of the mind which contains Engrams, Secondaries and Locks.

Blow:

1) Something that suddenly disappears (such as a problem or charge in general) is said to have blown.
2) To depart without authorization from an area. To leave suddenly without explanation. It can be used as a noun and as a verb.

Bullbaiting:

In coaching certain drills the coach attempts to distract the student auditor by doing Bullbaiting. This should be done by play acting situations that could occur in session, but other things can be used from time to time. As a bull-fighter attempts to attract the bull's attention and control the bull, so does the coach attempt to attract and control the student auditor's attention; however the coach flunks the student auditor whenever he succeeds in distracting the student from the drill and then repeats the action until it no longer has any effect on the student (see also Buttons).

By-passed Charge: (BPC):

1. Mental energy or mass that has been restimulated in some way in an individual, and that is either in part or wholly unknown to that individual and so is capable of affecting him negatively.
2. reactive charge that has been by-passed (restimulated but overlooked by both PC and auditor). When found and indicated the PC will experience relief. On a Meter you would see a Blowdown.

Case:

The sum of aberrated conduct or behavior resulting from the influences of the Reactive Mind. When a practitioner is displaying 'case' they are acting in an irrational and also unprofessional manner.

Case gain:

The improvements and resurgences a person experiences from auditing and training; any case betterment according to the PC.

Case Supervision: (C/S):

The inspection of auditing, by a qualified Case Supervisor (using auditor reports, session worksheets and Examiner reports); the ordering of standard actions and remedies to ensure maximum gains for the PC. The written instructions of a case supervisor.

Chain:

A series of incidents of similar nature or similar subject matter. When running a Chain the PC is sent earlier and earlier until it the Chain fully handled.

Chain of incidents: A whole adventure or activity of many incidents, related to each other by the same subject, general location or people. It can go way back in time.

Charge:

1. harmful energy or force accumulated and stored within the reactive mind. It's attention units trapped in past conflicts and unpleasant and painful experiences, etc. Auditing discharges this charge so the energy is no longer trapped nor there to affect the individual negatively. 2. *emotional* charge or energy.

3. by charge is meant anger, fear, grief, or apathy contained as misemotion in the case.

Check-out:

The action of verifying a student's knowledge of an item given on a check sheet. This is much like a verbal examination in school. But special attention is given to definitions of words and the student's ability to demonstrate principles with a demo kit.

Check sheet:

A Check sheet is a printed form that sets out the items to be studied or done by a student, item by item, on a course. It lists all the materials and drills of the course in the order in which they are to be studied.

Clay Demo:

Clay Demonstration. Making an illustration of the principles studied in model clay. The student demonstrates definitions, principles, etc. in clay to obtain greater understanding by translating significance into actual mass.

Clear:

1) A person (thetan) who can be at cause knowingly and at will over mental matter, energy, space and time as regards the first dynamic (survival for self). The state of Clear is above the release Grades (Grade 0-4) of Ability Clearing (all of which has to be done before you get to Clear).

2) A Being, who no longer has his own Reactive Mind.

Clearing:

Various techniques directed at improving abilities and awareness leading to the state of Clear. The activity done in auditing.

Coach: The person who helps another student understand or apply a particular text or drill. He is a one-on-one instructor. Usually students take turns being coach and student.

In Drilling: The one, that *directs the student*. She is the instructor of the drill, the one that calls the shots. The term 'coach' is best known from sports; he instructs the players and shows them what to do. During a game he gives the players practical advice from the sideline. 'Coach' is also used about a private instructor teaching a student.

Coaching:

Training intensively by instruction, demonstration and practice. In training drills, one twin is made the coach and the other the student. The coach helps the student to achieve the purpose of the drill. He coaches with reality and intention following the materials pertaining to the drill to get the student through it. When this is achieved the roles are reversed--the student becomes the coach and the coach becomes the student.

Co-auditing:

An abbreviation for co-operative auditing. It means a team of two people who are using Ability Clearing processes to help each other reach a better life. Sometimes three or more people make up a class of co-auditors who audit each other.

Cognition: (cog):

A PC origination indicating he has "come to realize." It's a "What do you know? I . . ." statement. A new realization of life. It results in a higher degree of awareness and consequently a greater ability to succeed with one's endeavors in life.

Communication Lag or Comm lag):

The time that passes between a question and an actual answer. It can be hesitation or reflection, but it can also be not answering the question by talking about something that isn't an answer. In study comm lag in a check-out is flunked. It shows the student doesn't know the materials 100%. In auditing comm lag is just an indicator. A long comm lag means there is aberration in the area.

Communication (Comm):

1) The interchange of ideas or objects between two people or terminals. More precisely the definition of communication is the consideration and action of impelling an impulse or particle from source point across a distance to receipt point, with the intention of bringing into being at the receipt point a duplication of that which emanated from the source

point. The formula of communication is: cause, distance, effect, with intention, attention, duplication and understanding. Communication by definition does not need to be two-way. Communication is one of the component parts of understanding.

2) The exchange or interchange of ideas or objects between two people or designated locations (terminals). More precisely the definition of communication is the consideration and action of impelling an impulse or particle from source point across a distance to receipt point, with the intention of bringing into being at the receipt point a duplication and understanding of that which emanated from the source point.

Communication, Control, Havingness Processes:

or CCHs. Processes which bring a person into better control of his body and surroundings, put him into better communication with his surroundings and other people, and increase his ability to have things for himself. They bring him into the present, away from his past problems.

Communication cycle: (comm cycle):

A completed communication, including origination of the communication, receipt of the communication, and answer or acknowledgement of the communication.

Computation:

technically is that aberrated evaluation and postulate that one must be consistently in a certain state in order to succeed.

Confront:

To face without flinching or avoiding. Confronting is actually the ability to be there comfortably and perceive.

Control:

The ability to start, change and stop things at one's own choice.

CT: Clearing Technology: Consists of Ability Clearing (the Grades) and Engram Clearing (Level 5). In this handbook we mainly use "Ability Clearing" to describe the whole subject.

Destimulation:

The action of deleting the moments of restimulation of the Reactive Mind or some portion of it, so that it moves away from the PC and he is no longer connected to it.

D of P Interview: (Director of Processing Interview): An interview of a PC by a D of P or available person. It is usually done on a Meter. The purpose is to get data for programming and C/Sing a case. It is not auditing.

Dramatization: (Dramatize):

To repeat in action what has happened to one in experience. It's a replay out of its time period now of something that happened then. The person is going through the motions of some incident as if he was an actor, but he does the re-enacting unknowingly.

Earlier Similar: (E/S):

When the auditor is checking the rudiments, he may run into the situation, that the difficulty doesn't resolve right away. To resolve the situation he will have the PC look for an earlier similar incident.

Earlier, means it happened before or further back in time, than the incident they were just talking about.

Similar, means it was somewhat the same type of incident. Maybe having to do with the same person or persons, the same place or the same surrounding circumstances. To ask for an *earlier similar incident* is used in many processes, as the reason the present incident does not resolve is because it unknowingly reminds the PC about earlier times. When he is sent earlier and the exact circumstances get known to him the subject matter will clear up.

EP:

End Phenomena Those indicators in the PC and Meter which show that a Chain or process is ended. In Engram running It shows that basic on that Chain and flow has been erased.

Engram:

is a mental image picture of an experience containing pain, unconsciousness, and a real or fancied threat to survival. It is a recording in the Reactive Mind of something which actually happened to an individual in the past and which contained pain and unconsciousness, both of which are recorded in the mental image picture called an Engram. It must, by definition, have impact or injury as part of its content. These Engrams are a complete recording, down to the last accurate detail, of every perception present in a moment of partial or full unconsciousness.

Engram Clearing:

This is Ability Clearing Grade 5 - Engram Clearing. It uses Engram running by Chains, Routine-3-RA as its main process. It routinely lead to the state of Clear. There are other processes that will take the PC to the state of Clear in the case this doesn't happen. But they will have to be done under the guidance of a professional auditor/ case supervisor.

Engram Running: Techniques used to run Engrams with. Also the activity of applying these techniques to a PC. Today the principal process used is R-3-RA.

Engram Running, 1950 Style:

Auditing out Locks, Secondaries and Engrams by using the original techniques of 1950.E/S, see Earlier Similar

Evaluate:

To judge and determine the meaning, correctness, value, and consequence of a datum (verb).

Evaluation:

1) Evaluation:

The act of evaluating. The result of something being evaluated (noun). A student has to evaluate the data studied. On the other hand he should not try to evaluate for somebody else. Each student should arrive to a result based on their own efforts. Only in this way will anybody achieve sufficient certainty.

2) In auditing: Telling a PC "what's wrong with him or why he is the way he is is incorrect. In auditing the auditor guides the PC to find explanations and solutions for himself. It is against the Auditors Code to evaluate for a PC in session. When a person is allowed to do his own evaluations he achieves greater certainty.

3) Any attempt by someone to impose his data or knowledge upon another. An example would be someone telling another why he is the way he is instead of permitting or guiding him to discover it for himself.

Flat:

No longer producing change or a reaction. Or, in Engram running, referring to an Engram, erased.

Flatten:

To continue to do (something) until it no longer produces a reaction.

Flatten a process: To continue a process as long as it produces change and no longer. In Engram running it is to continue running a Chain of incidents until basic on that Chain is reached and erased. With CCHs, it is three commands getting equal comm lag response with the PC doing the process.

Floating Needle: or F/N.

1.A floating needle is a certain needle behavior on a Meter. It is a harmonic motion sweep of the needle over the

dial at a slow, even pace. A valid floating needle is always accompanied by very good indicators in the PC.

2) The idle uninfluenced movement of the needle on the Meter dial without any pattern or reactions in it. It can be as small as 1-inch or as large as dial wide. It does not fall or drop to the right of the dial. It moves to the left at the same speed as it moves to the right. It is usually observed on a Meter calibrated with the Tone Arm between 2.0 and 3.0 with good indicators in on the PC. It can occur after a cognition, Blowdown of the Tone Arm, or just moves into floating. The PC may or may not voice the cognition.

Floating TA:

The PC is so released the needle can't be gotten onto the dial. The needle is swinging wider than the Meter dial both ways from center and appears to lay first on one side and then the other. The Tone Arm can't be moved fast enough to keep the extreme floating needle on the dial.

Flow:

A stream of energy between two points. An impulse or direction of energy particles or thought or objects between terminals. In processing the auditor works with four main flows:

FLOW 1: something happening to self. Another doing something to you, *FLOW 2:* doing something to another. You doing something to another., *FLOW 3:* others doing things to others. You see it happen as a spectator, *FLOW 0:* self doing something to self. You do something to yourself.

Flunk:

1) To make a mistake. Fail to apply the materials learned. Opposite of pass. Also used by coaches as a command: "Flunk!", to tell the student a mistake was made.

Fly a Rud: Fly a rudiment:

The auditor must get a free needle (floating needle) on one of the rudiment questions (ARC breaks, PTPs, Missed Withholds.) This is done to get a PC ready to run a Major Action.

Folder:

A folder sheet of cardboard which holds all the session reports and other items related to one PCs auditing. The folder is A4 or Legal size file folder made of light cardboard.

Folder Summary:

Sheets located inside the front cover of a PC folder giving an adequate summary of actions taken on a PC in consecutive order. It gives the content of the PC folder. The auditing history session by session, if you will.

Good indicators:

(GIs): Those observable indications that all is going well for a PC. The PC is bright, happy and winning. PC smiling and happy.

Grade Chart:

This chart shows all the levels of Clearing Technology auditing and training. It is the map of the road to Clear.

Grade:

A series of processes culminating in an exact ability attained, examined, and attested to by the PC.

Gradient:

Something that starts out simple and gets more and more complex. The essence of a gradient is just being able to do a little bit more and a little bit more and a little bit more until you finally make the Grade.

Grinding (Grinding out):

Going over and over and over a Lock, Secondary or Engram without obtaining an actual erasure. The sense of the word comes from the action of using an emery wheel on a hard substance with it not getting much smaller or thinner no matter how long it is done. It specifically applies to Engram running. It's a bad indicator.

Handwriting Drill:

If the C/S can't read the worksheets due to bad handwriting or lack of data he sends the folder back to the auditor for clarification. The auditor should overprint unreadable words with a red pen. The C/S sees to that his auditors catch up on writing understandable reports the first time and can have them train in handwriting drills to catch up on speed and clarity. The auditor should not have to spend a lot of time after session clarifying worksheets. He simply have to drill to write fast and readable, keep to essentials and quickly clarify worksheets after session. He may have to work on his handwriting letter for letter to make it easier to read.

Havingness:

The concept of being able to reach. Owning, possessing, experiencing. Affinity, reality, communication with the environment.

In:

Things which should be there and are or should be done and are, are said to be "in," i.e., "We got scheduling in."

Incident:

The recording of an experience, simple or complex, related by the same subject, location or people understood to take place in a short or finite time period such as minutes or hours or days.

In-session:

Interested in own case and willing to talk to auditor.

Interest: is absorbed attention and a desire to talk about it.

Invalidation:

Means a degrading, 'trashing', ridiculing, discrediting or denying something someone else considers to be a fact or of value.

Is-ness:

Something that is persisting on a continuum.

Item:

Any one of a list of things, people, ideas, significances, purposes, etc., given by a PC to an auditor while listing; any separate thing or article; in particular, one placed on a list by a PC.

Itsa:

A term made from "It is a"; a term for a PC's action of answering an auditor's question in which the PC positively identifies something with certainty.

Itsa-maker line:

Communication line from the PC to his own Bank. The PC is inspecting his Bank and is somewhat introverted. It's the most important part of the auditing comm cycle as the PC is confronting his Bank and finding answers.

Key in:

Is a moment where an earlier upset or earlier incident has been restimulated and affect PC in a negative way. The action of recording a Lock on a Secondary or Engram; the moment an earlier upset or earlier incident has been restimulated.

Key out:

The action of a reactive incident (or many related incidents) dropping away without the mental image pictures being erased. The picture is still there but now far away. The PC feels released or separate from his Reactive Mind or some portion of it. An action of an Engram or Secondary dropping away without being erased. Released or separate from one's Reactive Mind or some portion of it.

Know-to-Mystery Scale:

The scale of affinity from Knowingness, down through Lookingness, Emotingness, Effortingness, Thinkingness, Symbolizingness, Eatingness, Sexingness, and so through to Not-knowingness to Mystery.

L1C: Repair List used by auditors in session when an upset occurs, or as ordered by C/S. It handles ARC Broken, Sad, hopeless or nattery PCs. Questions can be prefaced with "Recently", "In this life", "On the Whole Track", or used without. It is not to be used to handle high or low TA.

L4 Short: (L4): This is a short version of list correction. It contains all the most common errors. It is valid on listing in progress or recently done. If it doesn't resolve the difficulties a full L4BRB can be used (see below).

List: As part of auditing procedure:

Items given by a PC and written down by the auditor. Prepared List: A printed form with questions used for assessment on a PC.

Listing:

A special Ability Clearing procedure used in some processes where the auditor writes down items said by the PC in response to a question by the auditor, in the exact sequence that they are given to him by the PC.

Listing and Nulling: (

L & N):

An Ability Clearing procedure in auditing done according to very exact rules as given in the Laws of Listing and Nulling. This is taught on Ability Clearing-3.

Locational processing:

1) Processing which establishes confront and communication with the environment. It brings the person into present time; he becomes more alert and responsive. It can be run on one PC or on a whole class of students at the same time with benefit. 2) Processing which establishes a stability in the environment of the PC on the subject of objects and people. It can be run in busy thoroughfares, parks, confused traffic or anywhere that there is or is not motion of objects and people. It is used in the auditing room itself to orient the PC.

Major Action:

any auditing action designed to change a case or general considerations or handle continual illness or improve ability. This means a process or even a series of processes like four flows. It doesn't mean a Grade. It is any process the case hasn't had.

Mental mass:

is contained in mental image pictures.

1) Mocking up matter, energy, space and time. Its proportionate weight would be terribly slight compared to the real object which the person is mocking up a picture of.

2) Mental matter, energy, space and time. It exists in the mind and has physical existence, that can be measured by a Meter. Its proportionate weight would be terribly slight compared to the real object which the person is making a picture of. The Meter registers mental mass; changes of the position of the needle indicates changes of the mass in PCs mind.

Mental image pictures: (MIP):

Mental pictures; facsimiles: a copy of one's perceptions of the physical universe of some time or incident in the past. It can also be mock-ups, meaning produced by the thetan with his imagination and not a copy of an actual incident.

Mental pictures:

Facsimiles and mock-ups; usually a copy of one's perceptions of the physical universe sometime in the past.

MEST:

Word coined from the initial letters of Matter, Energy, Space and Time; the physical universe and its component parts; also used as an adjective in the same sense to mean physical, as in "MEST universe," meaning "physical universe."

Method 3: (M3 Assessment):

An Assessment in which each reading question is taken up and handled with the PC when it is seen to read and before continuing the Assessment.

Method 5: (M5 Assessment):

Assessing a prepared list once through marking the length and Blowdown of all reads as they occur when the questions are asked of the PC. Those questions which read are then handled one at a time in order from the largest read to the smallest.

Mind:

A control system between the thetan and the physical universe. It is not the brain. The mind is the accumulated recordings of thoughts, conclusions, decisions, observations and perceptions of a thetan throughout his entire existence. The thetan can and does use the mind in handling life and the physical universe.

Misemotion:

Anything that is unpleasant emotion such as antagonism, anger, fear, grief, apathy or a death feeling; mis-aligned emotion, irrational or inappropriate emotion. Misemotion is also emotion which has been suppressed and which remains part of the individual's Locks and Secondaries unless he is audited.

Missed Withhold: (M/W/H):

A Withhold, which has been *restimulated* by another but not disclosed. This is a Withhold which another person *nearly* found out about, leaving the person with the Withhold in a state of wondering whether her hidden deed is known or not. The *Missed Withhold* is different from the Withhold as the PC's main worry is, if the other person found out or not. The action of the other to *nearly* find out or *maybe* he found out or guessed it is why it's called a *Missed Withhold*.

Mock-up:

Any "knowingly created" mental picture that is not part of a Time Track; can be used as noun: "It's a mock-up" or a verb: "to mock-up something".

Model Session:

The same exact pattern and script with which Ability Clearing sessions are begun and ended.

Motivator:

Actions which were directed against the PC by others or another, used by him to justify (used as a "motive" for) Overts; an aggressive or destructive act received by the person.

Not-is, Not-is-ness, Not-is-ing:

The effort to reduce an unwanted condition of existence by force. It can cause the person 'to forget about it' or make a thing look smaller, but does not handle the underlying difficulty. See also As-is

Null:

- 1) To nullify or to reduce the value or effect of something to nothing.
- 2) means there was no reaction of the needle on the needle dial of the Meter when the auditor had asked a question of the PC; or simply it didn't read.

Nulling:

The auditor's action in saying items from a list to a PC and noting the reaction of the PC's Bank on a Meter.

2) In Listing & Nulling: The auditor reads back the list of items the PC just gave him in order to find only one item that is still reading. This is done under the Laws of L&N.

Objective Processes:

Ability Clearing Level 1 processes which familiarize a person with his environment, the physical universe. Objective processes increase a PC's control, communication, and havingness on the environment.

Obnosis:

A word put together from the phrase, "observing the obvious."

Op Pro by Dup:

Opening procedure by duplication. A process which increases the PC's ability to duplicate and so increases his ability to communicate. A type of objective process.

Origination: In auditing:

A remark or statement from the PC, that concerns his ideas, reactions or difficulties. It is something he says, that is important to him, but isn't an answer to the auditor's question. It usually comes unexpectedly. It is different from a comment, that is defined as an attempt to distract auditor or an attempt to blow session. An auditor is trained in handling originations on TR-4.

Out:

Things which should be there and aren't or should be done or aren't are said to be "out," i.e., "Enrolment books are out."

Overrun:

- 1) Continuing to run an auditing action (in error) past the PC's attainment of its end phenomena. A person can also be overrun on things in life outside of auditing. This is doing something too long that has Engrams connected with it. As a result Engram Chains are being restimulated by life or auditing.
- 2) Accumulating protests and upsets about something until it is just a mass of stops.

Overt:

- 1) Overt act; an Overt is an aggressive or destructive act by the individual against one or more of the eight dynamics (self, family, group, mankind, animals or plants, mest, life or the infinite).
- 2) A harmful act. A bad deed. An Overt act is an act of omission or commission which does the least good for the least number of dynamics or the most harm to the greatest number of dynamics.
- 3) An aggressive or destructive act by the individual against one or more of the eight dynamics
- 4) That thing which you have done to others, but you aren't willing to have happen to yourself.

Overt-Motivator Sequence: or O/M: Overt Motivator):

- 1) The reactive series of events in which someone who has committed an Overt "has to" claim the existence of motivators (acts by others against self). Motivators are thus used to justify Overts and tend to be used to justify further Overts.
- 2) A chain of events of 'pay-back' or revenge that gets worse and worse.
- 3) See preclear.

Postulate:

A conclusion, decision or resolution made by the individual himself; to conclude, decide or resolve a problem or to make a plan or set a pattern for the future or to nullify a pattern of the past (like in New Years resolutions). We mean, by postulate, a self-created truth. A postulate is, of course, that thing which the individual uses to start a directed desire or order, or inhibition, or enforcement; it is in the form of an idea. Postulate means to cause a thinkingness or consideration.

Preclear: (PC):

From pre-Clear, a person not yet Clear; generally a person being audited, who is thus on the Road to Clear; a person who, through Ability Clearing processing, is finding out more about himself and life.

PC Information Sheet:

A form done with new PCs, or PCs who haven't been audited for some time (years). Doing the Form with a PC gives certain basic data that is necessary for the Case Supervisor. It is done by an auditor in session.

Prepared List:

The auditor, trained in using a Meter, can use prepared (printed) lists to find the specific problem or difficulty he needs to address to get the PC out of an unpleasant or puzzling situation in session. The list will contain all the possible difficulties for that action and the Meter will tell the auditor which ones to take up. A prepared list may turn up one thing or many things, that should be tackled before the routine process should be taken up again. Prepared lists can also be used to address a troubling area of PCs life and 'clean it up'.

Prep-check:

An auditing action in which a subject found to be charged is discharged by the use of a prepared list of buttons (called the Prep-check Buttons). Buttons such as 'Suppressed', 'Invalidated', 'Didn't Reveal', etc. are used to find charge and reactivity connected with the subject being prep-checked. There are 20 Prep-check buttons on the list.

Present Time Problem: (PTP):

A specific problem that exists in the physical universe now, on which a person has his attention fixed. This can be practical matters he feels he ought to do something about right away. Any set of circumstances that occupies the PCs attention, so he feels he should *do* something about it instead of being audited.

Problem:

Anything which has opposing sides of equal force; especially postulate-counter-postulate, intention-counter-intention or idea-counter-idea; an intention-counter-intention that worries the PC.

Process:

A specific technique used in auditing (processing). There are many processes. They consist of carefully worded questions and commands. They are used by an auditor in a formal session to help his PC.

Program:

A program is the overall plan of auditing of a specific PC. A program is the sequence of actions session by session to be undertaken on a case by the C/S in his directions to the auditor or auditors, auditing the case.

Psycho-somatic:

"Psycho", of course, refers to mind and "somatic" refers to body; the term psychosomatic means the mind making the body ill or illnesses which have been created physically within the body by derangement of the mind.

Quad Flows: (Quads):

(Four Flows) To run a process Quad Flows means, the four flows--another to self, self to another, another to another, and self to self --are run on a PC by an auditor.

Q and A: (Q&A):

Stands for Question and Answer. A failure to complete a cycle of action; to fail to complete a cycle of action; to deviate from an intended course of action; questioning the PC's answer; in auditing, it's a failure to complete a cycle of action on a PC.

Quickie:

Means omitting actions, for whatever reason, that would satisfy all demands or requirements and instead doing something superficially and accomplish less than could be achieved.

Reactive Mind:

The portion of the mind which works on a stimulus-response basis (given a certain stimulus it will automatically give a certain response) which is not under a person's volitional control and which exerts force and power over a person's awareness, purposes, thoughts, body and actions. The Reactive Mind never stops operating. Pictures of the

environment, of a very low order, are taken (recorded) by this mind even in some states of unconsciousness.

Read:

The action of the needle on the Meter dial falling (moving to the right); SF, F, LF, LFBD are reads.

Reality:

Has to do with agreement (or lack thereof). It is the agreed upon apparency of existence. A reality is any data that agrees with the person's perceptions, way of thinking and education. Reality is one of the components of understanding. Reality is what is.

Recall:

Present time remembering something that happened in the past. It is "not" re-experiencing it, reliving or re-running it. You are in present time, thinking of, remembering, putting your attention on something that happened in the past --all done from present time.

Rehabilitation (Rehab):

The restoration of some former ability or state of being or some more optimum condition.

Release:

A PC whose Reactive Mind or some major portion of it is keyed out and is not influencing him. In Ability Clearing processing there are five major Grades of Release. They are, from the lowest to the highest: Grade 0, Communications Release, Grade 1, Problems Release, Grade 2, Relief Release, Grade 3, Freedom Release, Grade 4, Ability Release. Beyond that other Grades have been developed: Grade V Power Release, Grade VA Power Plus Release, Grade VI Whole Track Release.

These additional Grades are unnecessary if PC goes Clear on Engram Clearing. Each is a distinct and definite step toward greater levels of awareness and ability. (See also Grade).

Religion:

1. The ritual of worship or regard about spiritual matters. 2. A study of wisdom. 3. The word religion itself can embrace sacred lore, wisdom, knowingness of gods and souls and spirits, and could be called, with very broad use of the word, a philosophy. We could say there is religious philosophy and there is religious practice.
2. Religious Philosophy, implies study of spiritual manifestations: research on the nature of the spirit and study on the relationship of the spirit to the body; exercises devoted to the rehabilitation of abilities in a spirit. Religious Practice, implies ritual, faith-in, doctrine based on a catechism and a creed.

Repair:

Patching up past auditing or recent life errors. This is done by prepared lists and other processes or completing an incomplete process.

Repetitive Process:

A process, where the same auditing question or command is given many times to the PC. The PC is finding new answers every time. The auditor will state the command as it has never been asked before in a new unit of time, but with no variation of words; he will acknowledge the PC's answer and handle the PC origins by understanding and acknowledging what the PC said. This type of process will permit the individual to examine his mind and environment thoroughly and sort out relative importance's.

Restimulation:

Condition in which part of the Bank has been "triggered" by something in the person's environment (a restimulator) causing some greater or lesser degree of reactive behavior or condition; doing something unknowingly, unwittingly and without any understanding of what one is doing.

Review:

When a PC is having difficulty of some sort that is not immediately resolving with the actions being done, he may be sent to Review, where his case folder is carefully checked over or "reviewed" and the necessary corrective actions then taken to resolve the difficulty.

R-Factor:

Reality factor; explanation, information, data, etc., given to a person in order to bring about sufficient understanding for him to be able to perform a specific action. It is usually very short, like a few sentences.

Roller coaster: 1. A case that betters and worsens. A roller-coaster is always connected to a suppressive person and will not get steady gains until the suppressive is found on the case or the basic suppressive person earlier. Because the case doesn't get well he or she is a potential trouble source to us, to others and to himself.
2. Case gets better, gets worse, gets better, gets worse.

Rudiments:

First principles, steps, stages or conditions. The basic actions done at the beginning of a session to set up the PC for the major session action. The normal rudiments are ARC breaks (upsets), Present Time Problems (worries) and Withholds (something PC feels he shouldn't say) - they are explained under each heading.

Rundown (R/D, RD):

A series of specific auditing actions done on a case designed to produce a specific result.

Scientologist

1. one who betters the conditions of himself and the conditions of others by using Scn technology.
2. one who controls persons, environments and situations. A Scientologist operates with the boundaries of the *Auditor's Code* and the *Code of a Scientologist*.
3. one who understands life. His technical skill is devoted to the resolution of the problems of life.
4. A specialist in spiritual and human affairs.

Secondary:

A Secondary is a mental image picture of a moment of severe and shocking loss or threat of loss which contains misemotion such as anger, fear, grief, apathy or "deathfulness." It is a mental image picture recording of a time of severe mental stress. It may contain unconsciousness.

Self-Determinism:

The ability to regulate and take responsibility for one's own considerations and actions; motivation by the thetan rather than by the environment.

Service Computation: or Service Facsimile:

Serv Fac, a Ability Clearing Level 4 term. The service computation is that computation generated by the PC (not the Bank) to make self right and others wrong; to dominate or escape domination and enhance own survival and injure that of others.

Session:

- 1) A precise period of time during which an auditor audits or processes a PC. That's an auditing session.
- 2) In coaching it is a precise period during which the coach instructs the student in a specific drill using his coaching instructions and written materials to correct the student. That's a coaching session.

Slow Assessment:

means letting the pc itsa while assessing. This consists of rapid auditor action, very crisp to get something that moves the TA and then immediate shift into letting the pc itsa during which, "Be quiet!" The slowness is overall action. It takes hours and hours to do an old preclear assessment form this way but the TA flies.

Stable Datum:

Any body of knowledge, more particularly and exactly, is built from one datum. That is its stable datum. Invalidate it and the entire body of knowledge falls apart. A stable datum does not have to be the correct one. It is simply the one that keeps things from being in a confusion and on which others are aligned.

Terminal:

Anything that can receive, relay or send a communication (most common usage); also, anything with mass and meaning. "Terminal" means in our language "the end point of a communication line". It can be a person or a thing.

Theta:

Energy peculiar to life or a thetan which acts upon the material in the physical universe and animates it, mobilizes it and changes it; natural creative energy of a thetan which he can direct toward survival goals, especially when it manifests itself as high-toned constructive communications.

Thetan:

From THETA (life static), a word taken from the Greek symbol or letter: theta, traditional symbol for thought or spirit. The thetan is the individual himself--not the body or the mind. The thetan is the "I"; one doesn't have or own a thetan; one is a thetan.

Time Track:

1) The endless record complete with 55 perceptions of the PC's entire past; the consecutive record of mental image pictures which accumulates through the PC's life or lives. It is very exactly dated.
 2) The consecutive record of mental image pictures which accumulates through the PC's existence. The *Time Track* is a very accurate record of the PC's past, very accurately timed and very obedient to the auditor. If a motion picture film were 3D, had fifty-two perceptions and could fully react upon the observer, the *Time Track* could be called a motion picture film.

Tone 40:

Intention without reservation or limit; an execution of intention.

Tone scale: The basic tone scale is a scale of emotions, from apathy to enthusiasm. Different levels of the tone scale have other characteristics visible in behavior and as potential survival (see also Uptone).

Touch Assist:

An assist that brings the person's attention to injured or affected body areas. When attention is withdrawn from them, so is circulation, nerve flows and energy, which for one thing limits nutrition to the area, and for another limits the drainage of waste products. Some ancient healers attributed remarkable flows and qualities to the "laying on of hands." Probably the workable element in this was simply heightening awareness of the affected area and restoring the physical communication.

Training Routines: (TRs): Training drills:

on Ability Clearing courses which train students to perfect their communication skills to the level needed by an auditor in session. The TRs take up and drill the component parts of communication. Good TRs are the 'Carrier wave' needed to make processes work. Specific auditor skills in communication and smooth session control are gained in doing the TRs.

Two-way communication (TWC, 2WC, Two-way comm):

Are the precise process of getting somebody to open up and give emotional or personal information about himself. It is not chatter. It is governed by the rules of auditing.

Understanding:

Composed of affinity, reality and communication. These three things are necessary to the understanding of anything. One has to have some affinity for it, it has to be real to him to some degree and he needs some communication with it before he can understand it. Greater understanding comes about by increasing any one of these three factors.

Upper Indoctrination TRs (Upper Indoc's): Purpose of these four training drills is to bring about in the student the willingness and ability to handle and control other people's bodies and to cheerfully confront another person while giving that person commands. Also to maintain a high level of control under any circumstances.

Uptone:

At a high level of survival or state of being, plotted on the tone scale. A person who is uptone, or high-toned, has a greater ability to handle his facsimiles, to control his environment and has a greater degree of survival than someone who is downtone, or low-toned.

Valence:

Is the assumption at the reactive level by one individual of the characteristics of another individual. An individual may have a number of valences which he puts on and off as he might hats. Often these changes are so marked that an observant person can notice him dropping one valence and putting on another. The shift from valence to valence is usually completely outside the awareness and control of the individual doing so. In other cases an individual has one valence, not his own, in which he is thoroughly stuck.

Whole Track:

Time Track. The moment to moment record of a person's existence in this universe in picture and impression form.

Withhold:

An undisclosed harmful (contra-survival) act. After having committed an Overt, the person wants to keep it hidden or secret. So he/she withholds the Overt.

Worksheet: (W/S: WS):

The sheets on which the auditor writes a complete running record of the session from beginning to end, page after page, as the session goes along.

~oo00oo~

**Quote from
L. Ron Hubbard**

“No culture in the history of the world save the thoroughly depraved and expiring ones, have failed to affirm the existence of a Supreme Being.”
