Important Note

In studying Dianetics and Scientology be very, very certain you never go past a word you do not fully understand.

The only reason a person gives up a study or becomes confused or unable to learn is that he or she has gone past a word or phrase that was not understood.

Trying to read past a misunderstood word results in mental "fogginess" and difficulty in comprehending the passages which follow. If you find yourself experiencing this, return to the last portion you understood easily, locate the misunderstood word and get it defined correctly—and then go on.

~ Editorial ~

reservo, servo, proveho

Dear Reader,

In this issue we have an extended article by Ron on the subject of Banking. This is from the Finance Series and although written some years ago is still relevant to day just as it was then.

A very enlightening read for me and I am sure will be for some of our readers.

Plus we have all the regular features including some wonderful success stories.

It would be nice to get some feedback and perhaps also some Letters to the Editor to publish.

In addition please feel free to let me know what you would like to see in the Newsletter, any particular quotes, references and so forth.

Until next time.

Much arc,

Michael Moore
Editor

The Aims of Scientology and APIS

Lafayette Ron Hubbard first issued the 'Aims of Scientology' which of course still stands. Yet, despite holding a copyright on these aims the Church of Scientology, RTC and the CST do not appear to be following these aims fully. Therefore it behooves us to take some responsibility and set out our aims, based upon the aims that Ron first envisaged as something which we can honestly strive to attain.

We therefore stated below:

The Aims of APIS

To contribute towards having a sane society by the promotion, expansion and application of the technology to the point where people can live their lives in peace and security and without war or insanity and where they can honestly flourish and prosper and attain higher levels of spiritual being.

APIS is non political in nature and welcomes any individual of any creed, race or nation.

APIS does not seek revolution. APIS seeks only to assist in paving the way for evolution to higher states of being for the individual and for society. After endless millennia of ignorance about himself, his mind and the universe, a breakthrough has been made for man by Lafayette Ron Hubbard with the philosophy and the technology he developed to free man from the shackles of his mind.

According to Lafayette Ron Hubbard, "The combined truths of fifty thousand years of thinking men, distilled and amplified by new discoveries about man, have made for this success."

We welcome you to APIS. We would like your help in achieving our aims and helping others and we hope to be able to help you in return.

The original working technology of Lafayette Ron Hubbard is the most vital movement on Earth today. In a troubled world, the job of promoting and applying this technology is not easy. But then, if it were, we wouldn't have to be doing it.

APIS does not owe its help not having done anything to caused it to propitiate. We are here because we want to be here and we want to assist Ron in his aims.

As Ron says:

"Man suspects all offers of help. He has often been betrayed, his confidence shattered. Too frequently he has given his trust and been betrayed. We may err, for we build a world with broken straws. But we will never betray your faith in us so long as you are one of us.

The sun never sets on Scientology.

And may a new day dawn for you, for those you love and for man.

Our aims are simple, if great.

And we will succeed, and are succeeding at each new revolution of the Earth.

Your help is acceptable to us.

Our help is yours."

'The Aims of Scientology' -- Lafayette Ron Hubbard

WHAT IS GREATNESS?

L. Ron Hubbard

The hardest task one can have is to continue to love one's fellows despite all reasons he should not.

And the true sign of sanity and greatness is to so continue.

For the one who can achieve this, there is abundant hope. For those who cannot, there is only sorrow, hatred and despair, and these are not the things of which greatness or sanity or happiness are made.

A primary trap is to succumb to invitations to hate. There are those who appoint one their executioners. Sometimes for the sake of the safety of others, it is necessary to act, but it is not necessary also to hate them.

To do one's task without becoming furious at others who seek to prevent one is a mark of greatness—and sanity. And only then can one be happy.

Seeking to achieve any single desirable quality in life is a noble thing. The one most difficult and most necessary to achieve is to love one's fellows despite all invitations to do otherwise. If there is any saintly quality, it is not to forgive. "Forgiveness" is a much lower level action and is rather censorious.

True greatness merely refuses to change in the face of bad actions against one—and a truly great person loves his fellows because he understands them.

After all, they are all in the same trap. Some are oblivious of it, some have gone mad because of it, some act like those who betrayed them. But all, all are in the same trap—the generals, the street sweepers, the presidents, the insane. They act the way they do because they are all subject to the same cruel pressures of this universe.

Some of us are subject to those pressures and

still go on doing our jobs. Others have long since succumbed and rave and torture and strut like the demented souls they are.

To re-save some of them is a dangerous undertaking. Were you to approach many ruling heads in the world and offer to set them free (as only a Scientologist can) they would go berserk, cry up their private police and generally cause unpleasantness. Indeed, one did—he was later assassinated by no desire of ours but because of the incompetence of his own fellows about him. He could have used Scientology. Instead, he promptly tried to shoot it down by ordering raids and various berserk actions on Scientology organizations. That he was then shot had nothing to do with us, but only demonstrated how incompetent and how mortal he really was.

As we become stronger, we can be completely openhanded with our help. Until we do, we can at least understand the one fact that greatness does not stem from savage wars or being known. It stems from being true to one's own decency, from going on helping others whatever they do or think or say and despite all savage acts against one; to persevere without changing one's basic attitude toward Man. A fully trained Scientologist is in a far better position to understand than a partly trained one. For the Scientologist who really knows is

able not only to retain confidence in himself and what he can do, but also can understand why others do what they do and so knowing, does not become baffled or dismayed by small defeats. To that degree, true greatness depends on total wisdom. They act as they do because they are what they are—trapped beings, crushed beneath an intolerable burden. And if they have gone mad for it and command the devastation of whole nations in errors of explanation, still one can understand why and can understand as well the extent of their madness. Why should one change and begin to hate just because others have lost themselves and their own destinies are too cruel for them to face. Justice, mercy, forgiveness, all are unimportant beside the ability not to change because of provocation or demands to do so.

One must act, one must preserve order and decency, but one need not hate or seek vengeance.

It is true that beings are frail and commit wrongs. Man is basically good but can act badly.

He only acts badly when his acts done for order and the safety of others are done with hatred. Or when his disciplines are founded only

upon safety for himself regardless of all others; or worse, when he acts only out of a taste for cruelty.

To preserve no order at all is an insane act. One need only look at the possessions and environment of the insane to realize this. The able keep good order.

When cruelty in the name of discipline dominates a race, that race has been taught to hate. And that race is doomed.

The real lesson is to learn to love.

He who would walk scathe less through his day must learn this.

Never use what is done to one as a basis for hatred. Never desire revenge.

It requires real strength to love Man. And to love him despite all invitations to do otherwise, all provocations and all reasons why one should not.

Happiness and strength endure only in the absence of hate. To hate alone is the road to disaster. To love is the road to strength. To love in spite of all is the secret of greatness. And may very well be the greatest secret in this universe.

~ Special Feature ~

New Standard Tech Organisation

Auditing in session

Hubbard Free Org

The latest organisation to join APIS is the Hubbard Free Org,

Set up in 2011, it is run and administered by Myk Walton Class VI Auditor, it is based in Riverside county in an area called "Golden Era Gilman Hot springs" ironically close to (not no association with) Golden Era in Hemet California.

The Hubbard Free org begin in early 2014 when Myk Walton and a team of others left the church dissatisfied with the move away from standard tech.

He began a home based organisation dedicated to delivering standard tech as emulated in their Mission Statement:

Hubbard Free Org is dedicated to clearing and delivering 100 percent standard tech

The center is about an hour's drive from Los Angeles and trains up to Grade V and also runs a body detox (purification) program.

The org is fully equipped to train and has all the original standard bridge LRH materials.

Pricing is a very modest at \$100 dollars an hour for counseling and 100 dollars for a five hour Body Detox (purification of the body) Run-down session.

The staff complement consists of:

Auditors:

Myk Walton Class VI Case: Sunshine RD (Sunrise)

Trained at Tustin Org in 2013

Erik Arnett Class V 2011 Case: NED

Michael Diaz 1987 Class X Case: OT VIII
Trained to Class X in FZ Class VIII at Flag
Handles the EO post and audits OT levels

C/S

Lisa Diaz Class IX 1988 Case: OT V

Trained at CC LV to Class IX at CC LV

Specialises in Bridge, NED and OT Levels.

Lisa is also the C/S for the center.

Registrar

Margarita Zamudio Class III Case: Grade 2

Success Stories

In a six month period the Hubbard Free Org has had over 6 people go Clear and 3 go OT. Here are a couple of the many Success Stories

I went in for my grades and was amazed at how fast I was able to get through them! Lying to family members, broken ambition and hearts. I loved the professionalism of the org"

"The purif was awesome! I felt like I was doing it at the church. All my vitamins and uniform and everything! It was amazing. I really loved Myk and his warm heart and the precision of the customized purif for me."

Regain your **ABILITY and POWER** as a Thetan

by L. Ron Hubbard

INTENTION. The ability to intend. And intention contains in it every power the Thetan has. The ability to throw a lightening bolt. The ability to hold something in position. The ability to make something continue. The ability to do away with something. Strength. Accomplishment. Power. Wit. Ability. These things are all wrapped up in the one common denominator of INTENTION.

You've been able to do this in recent times. It baffles you sometimes when a piece of MEST does not instantly and immediately obey, but it's simply a matter of intention.

You intend something to happen and it happens. This is the ability to intend. And that is all there is to a thetan's power - there is no more to his power than that.

Intention is everything in case recovery. A person is as weak as his intentions are blunted. He will become as strong as his intentions are free. The greatest holder-backer of intention is the person himself. If he is regaining his power or ability or something like that, he's merely moving out of his road what blunts his intention and what has blunted his intentions, and that's all he is really doing.

Well, now he can go all the way, that is well within his grasp, and if he walks along a certain path and doesn't keep jumping off the cliff and so forth, why he will arrive.

Expanded Know to Mystery Scale

But you get a condensation of knowingness. A condensation of knowingness occurs down to lookingness. One has something to look at. And then this condenses and we get emotion. And this condenses and we get effort. And this condenses and we get thinkingness -you know, figure-figure. And this condenses and we get symbols. And the symbols condense and we get eating and the eating condenses and we get sex and the sex condenses and we get mystery.

Now, we could go on down south again and say, below mystery we get peering. And below peering, why, we would of course get misemotion. And below misemotion we would get horror of effort. And below horror of effort, why, we would get something on the order of a circuit instead of thinkingness, you see.

And below this circuit, why, we would get incomprehensible symbols and sciences like psychology. And below, and below this circuitry we would get indigestion. And below indigestion we'd get sterility and impotence. And below this, why, we would get unconsciousness.

Wins & Gains in the Independent Zone

What I have learned is that cases do not progress beyond their Scientology education level. A case hangs right at the point to which it has been educated in Scientology. Processing gains are parallel to education gains and the two balance.

Rons Journal Dec AD 13

Book One

I am training on Book 1 and I am having the time of my life.

I had my first real session the other day. I audited my wife. I ran an engram to full erasure and watched the somatic lift before my eyes. It was the best feeling I think I have had my entire life.

We are working on the ally computation now and I had a cog on it. The ally comp so simple. When a person is helped by someone and as a result they admire that person so much that they begin to be like them.

This is the ally comp. I see this all the time in everyday life.

It really works!!! It's so much more of a reality to me now. ha ha!!

Handbook for Preclears

So I've jumped head first into the Handbook for Preclears. And, WOW is all I can say. I've only done the first 3

Acts, but it's amazing how much I am already learning and Winning. For instance, it was amazing to see how much my overbearing mother (don't get me wrong, I love her to death) has effected my life and shaped who I

am. And, I discovered that my father has had much more impact and effect on who I am than I originally thought. With my mother being overbearing, I figured my father got washed out somewhere. Not so, judging from my cognitions.

Also, I realize that I am obsessed too much with my past mistakes and actions. Now that I am aware of these things, it's time to take these Wins and build on it to unenturbulate even more of my theta! It had been a while since I had a major Win (reading SOS, while an amazing and excellent journey, did get a little tedious in the end). The Handbook for Preclears appears to be the next great step for me on the Bridge!

TECH outside COS: Method 1 win

I just finished the Mini Method 1 Co-audit course. This is exciting for me because I've previously just been a solo auditor. I look forward to helping others clear up definitions.

Success M-1 Completion

First, M-1 was lot of fun! Call me a geeky weirdo if you want, but looking up definitions, knowing what some

word means completely and with certainty is just a blast. Also had a wonderful time delving into grammar--another fun endeavour.

Second, as a result of M-1 I'm spotting many words, long part of my daily vocabulary, that I have never actually

looked up. I have meanings for these words, probably pretty accurate ones, but where did those meanings come

from if I've never looked the word up? And how can I have complete certainty of no misunderstanding. if I've never looked them up? All these fractional uncertainties add up. Before M-1 I would not have spotted these words.

Third, M-1 has had a rehabilitating affect on my curiosity to find out about new things:

"Who is that person?", "I don't know about that subject.", "Gee, what IS the definition of that word?"

So thanks to my terrific auditor Geri, excellent c/s Pat, Ron (of course) and the cats!

Objectives

At first, running Objectives seemed boring. As it went on, there were a few interesting cognitions. Had some fun

with "Touch that (object). Touch that (body part), as it sometimes felt like I was doing the "Macarena" dance! I can touch anything or get any idea I want. I enjoyed "Get the idea of making that (object) disappear"! At the end, I didn't even have to look at the object to make it disappear! The possibilities!! Thank you.

Primary Rundown

(Note. the PRD consists of looking up every word in the study tapes and in the student hat pack before hearing the tapes or reading the pack. It preceded the KTL course by several years. Its product is a being who is super-literate. The course used to be prerequisite to all auditor courses.)

On Course last week, I did a very long word chain, easily over 50 words, and it was rather like a conceptual, very difficult to confront and

sort out and when I finally hit the end of the word chain and starting coming back to the beginning of it, I discovered this basic conception of Right/Wrong, the dichotomy that I used in order to evaluate, it's either "right" or "it's wrong" and that was the basis of my evaluations many a' time.

So, since all fixed ideas are contra-survival (LRH ref: APA), it did not work as an evaluation mechanism, and after contacting it -- the original decision to decide that way -- I now know that that such a basic, fixed idea is aberrative, as there are no absolutes, including no absolute right and no absolute wrongs, so it is not a panacea to evaluation. Contacting that postulate devaluated the consideration, and I find, in the days since, I am less fixed on subjective vs objective imbalances. I can deal with the dichotomy so much better. As a result, I am in less problems, can apply force where I see necessary, and not go "It's Right!" or "It's wrong!" first and then fall into a probable lose. I am a little over half way through the entire PRD, and thus far I have found it to be a great gradient onto my Bridge.

It has been very difficult and confusing at times, but the stable datum I have applied is THE WAY OUT IS THE WAY THROUGH. And I really acknowledge LRH for adding this at the bottom of the Bridge as he did. I find it makes me an independent thinker by causing me to make my own conceptual understandings regarding English words, and I feel that it is totally in-line with the whole principle of Scientology and "knowing how to know" - and the purpose to increase self-determinism, as that is the product I am experiencing from this Rundown. Thank you again, and I am looking forward to doing my Personal Bridge properly, on a gradient that I can actually DO, not some steep gradient of starting my OT Levels before I have even begun.

Grade 1

I feel able to have good problems and to sort of

sidestep bad problems, that is, instead of tearing and digging through the problem to the "solution" (which is now a new problem), I'm looking at other factors and areas of the problem. Also I feel something about letting time or the problem itself unravel itself, that doing so will be apparent or just happen in the future, not forcing but allowing, and controlling by postulate and even exteriorization instead of by energy. It feels more like a beingness that just is and is hard to verbalize.

WOW! Amazing when you first start this level how you "have problems" (or, think you don't). I sort of already

knew but now DO know with certainty the source of these "problems".

I had an awesome cognition regarding a "problem" at home. It had to do with a brand new big red farm tractor sitting idle in my backyard, which was supposed to be used for levelling out the yard in preparation for some grass and a play set for our children. As this nice new tractor sits there waiting to rust, I just realized that I was taking responsibility for this "problem" to exist and persist and not change! Well let me just say that I will now take responsibility and control and make this supposed "problem" VANISH! I just might take this tractor for a spin - HAH! No Problem! Level the house?! NO PROBLEM!!

I practically jumped out of my chair when I realized I had no problems after all! I can confront the source of a problem, take control, and make it vanish!

Grade 2

"Reflecting back on this Level, I realized how lucky and thankful I am to have a pretty uneventful life.

I realized that I had a few continuing overts against myself and this level helped me to see them. A few separate processes kept showing me how I was withholding true happiness from myself and not living to my full potential.

Another cognition I had was realizing that YOU are the only one who is responsible for YOUR life.

To be continued.....next level, auditor!

Correction

In the Februarys Newsletter two success stories appeared to be merged into one. This was incorrect.

The success story that follows was an independent success story and not related to the prior one .

"I had many realizations about how we mock up our own existence and then "forget" in order to have a game.

Some abilities gained (regained) are to know when I get myself into a pickle in a game I am playing (pre-cognitively), the ability to recognize and disperse case when it begins to impact me, and the ability to "separate" myself from the solidity of the physical universe. Pretty nice gains for such a short action! Doug Cook

Preserve, Protect & Promote

AND THAT IS BANKING

A Quote from the Finance Series
by L. Ron Hubbard

You might be interested to know something about banking and money that bankers and governments don't know: **BASICS!**

These are very simple basics. They are also very, very 0 - - - L - - - D basics.

Money can be said to be a lot of things. It can be said to be an idea backed by confidence. It can be said to be a system of exchange. It can be said to be something easier to carry around than a side of beef or a bushel of wheat. Money can be said to be a lot of other things.

But from the viewpoint of a banker and solid facts, you get the basic law of banking and the basic definition of banking and money.

MONEY IS A NEGOTIABLE RECEIPT FOR DEPOSITED GOODS.

In order to understand this, you have to understand the original function and practices of (surprise!) goldsmiths! You see, goldsmiths simply used gold as a commodity. It went like this: The goldsmith took in a commodity of one unit of gold. He gave a receipt to the per-

son who gave him the gold. He did this several times. He then had, let us say, six receipts-six guys had given him gold to hold and he gave them each a receipt. These six guys could then use those receipts as currency since it was gold on deposit with the goldsmith. This is a one-to-one basis. One receipt given out for one unit of gold taken in.

Now the goldsmith, because he assumed and hoped that all six guys wouldn't want their gold all at the same time, could then issue additional receipts against the gold-against the same gold for which he issued the first six receipts. So he would issue receipts on, let's say a three-to-one basis-he issued three receipts for every one unit of gold he had on deposit. These receipts were trusted because people knew he had gold on deposit.

So you see the goldsmith issued more receipts than he had gold on deposit. He could then loan out these receipts (currency) that he had created. People "borrowed money" from him by obtaining one of these receipts and now they would owe him what they borrowed plus interest. **AND NOW THE GOLDSMITH WAS INTO BANKING. IT WAS THAT STEP THAT PUT HIM INTO BANKING.**

You see, there were other things this goldsmith could do. He could issue receipts and buy property or keep his business running or something. But the moment he issued and handed out a receipt to people who used that for currency, why, he was now into banking.

And that is banking.

Now you can do the same thing with commodities. You have a warehouse and you're into banking. If everybody puts his commodity in the warehouse and the banker issues a receipt for it, he can now issue on a three-to-one basis, as the goldsmith did, or twelve-to-one, which is getting pretty risky but they did that. But,

you see, he can do the same thing with commodities. I don't care if they're shoes or whatever. Now, because he's got shoes (and other things) in the warehouse, he can issue general receipts against these goods on a basis of one to one, which is just the depositors, on up to twelve to one.

And he can take those receipts and he can issue them to a manufacturer who can then buy with those receipts the equipment necessary to set up his plant. But everything the manufacturer makes is a commodity deposit. The manufacturer makes something and now he has a commodity deposit. When you realize that the banker is not taking in all this commodity, you realize it starts sitting all over the place in all kinds of different warehouses and so forth. But it is consigned to the bank. It belongs to the bank. It backs up the receipts. The guy who the banker loans the money to, just out of the blue sky, doesn't have any commodity there. The banker loaned out money (a commodity receipt) to a guy without any commodity. Well, that guy has got to put a commodity there. And this is the basis of banking. If that guy now doesn't manufacture commodity, the banker is out of luck. In other words, he doesn't produce the commodity he's loaned money to produce. The banker now only has the plant.

So now we're off into the banker loaning against the plant. We've extended it from the deposited goods to what makes the goods.

And that is banking. And that's all there is to banking.

And that's why you see bankers favoring short-term loans. They're not interested really in a real estate loan. That's a secondary stage. They're interested in the cars sitting on the lot at Chrysler. I noticed that when a European automaker recently went to blazes, a fleet of their cars turned up as being sold to a bank in America, after that company went defunct. In

other words, their manufactured cars became, just as Chrysler's would become, the property of the bank.

Now what is inflation?

INFLATION IS DETERMINED BY THE RATIO BETWEEN THE DEPOSITED GOODS AND THE NUMBER OF RECEIPTS ISSUED.

This present society has got it up to several thousand to one. In banking, I would never go above three to one. That is sound banking.

All right. Let's recapitulate. We started by issuing receipts for deposited goods. Then we extended it to what makes the goods. And we're going to issue receipts on a safe, intelligent basis—a three-to-one basis, for example. All right. This is sound banking.

But these current "bankers extend it out on whether or not they think the guy's credit is any good. They extend it out on to whether or not he's going to issue stocks or shares of his own. (His own issued "receipts.") And then they're going to keep those as security and, honest to Pete, you're now up here in froth. That is strictly froth. This whole current banking system is in froth. Even the American Federal Reserve. They write down a figure in a little book and tell the US Government that it can now print that much money. (You may think I'm kidding—I assure you, I'm not.) To back that money, the Federal Reserve issues Federal Reserve Stock, called Federal Reserve Bonds and so forth, which is bought by the public. Just recently, two "issues" have gone out on the same transaction which was based on nothing to begin with.

In other words, they don't just issue a hundred million dollars in currency. They issue a hundred million in currency and a hundred million in bonds. So regardless of their computations,

they have not really issued a hundred million, they have really issued two hundred million, which doubles instantly the amount of paper in the society on the same transaction. Result: more inflation.

Hold on, it gets crazier.

Of this transaction, only half of it is covered by interest-only the bonds. So they feel they're getting only half the interest because the total issue of paper was two hundred million, and they're only drawing interest on the bonds, one hundred million. So, "of course" they have to get twice as much interest on the bonds. And there shoots up the interest rates and now money becomes too expensive to borrow in order to manufacture something and there goes your new and future commodities and eventually there goes your society.

And (currently) that is banking (unfortunately).

But don't you be confused. It is really very, very simple. For instance, if you can get the idea that you would take all of your household goods and give them to a bank and they would put them in their basement and then they would give you a receipt for the household goods and then you could give that receipt to somebody else for some negotiated action-you wanted something they had or would do for you-why, then you'd understand banking.

And if you can get the idea that that other person that you gave your receipt to could then go claim those household goods if he chose to, then you'd understand banking.

And if you can get the idea that that other person might not (probably wouldn't) go claim those household goods, but instead that he might transfer the receipt that you gave him (that you got from the bank) to somebody else for something that he wanted, then you'd understand banking.

And if you can get the idea that even though this other fellow didn't take your receipt and go claim the household goods, that the receipt does, in fact, represent that item of household goods that it is for and that those receipts are backed up by those household goods, why, then you'd understand banking.

And now we go a bit further and if you can get the idea that we don't bother to put those household goods in the bank's basement-we leave them in your home-but that in essence you have sold them to the bank for the receipt they gave you (and this is what is known as collateral), then you'd understand banking.

And now we go way upstairs and if you can get the idea that the bank would print up and issue receipts on a greater than a one-to-one basis (three to one or six to one, for example), and then loan these receipts to someone so that he could exchange them for manufacturing equipment, for example, and produce a commodity and that then these receipts that had been issued to the manufacturer were now, in fact, backed up by goods, then you would understand banking, REAL banking. And you would understand that banking, real banking, can all by itself, increase production. And lo and behold, **THAT WAS THE ORIGINAL PURPOSE OF BANKING!**

And that is banking. That's all there is to it. That's the basics. That's it!

You see, violations of these basics are what got the current bankers and governments in their present predicaments. Oh sure, they have this plan and they have that plan. But let me point out to you that they had those plans last year and the year before that and that their own economic troubles, budget deficits, etc., last year were not as bad as this year! So maybe there's something a little wrong with their plans. Well, yes, there is a lot wrong with their "plans"-their basics are out.

As a banker you can stretch that three to one, like the goldsmith did, to five to one, or twelve to one. But when you get up to astro-ratios like these current bankers, boy are you in trouble. You can get a run on a bank. A run on a bank is when all the guys who hold receipts suddenly believe the goldsmith is about to blow or leave town so they all go in and ask for their gold at the same time.

Well now, of course, he can't pay it out because he is not holding that much commodity. So if he had issued receipts on a twelve-to-one basis, NOW his receipts are worth 1/12 (one twelfth) what they had been worth, just like that.

Anyone who can recall back to the 1930's will tell you . . . "and that was banking!"

These basics would be known by the Wizards of Wall Street, you would think, but maybe not.

They certainly are not known to London's Parliament. They might say, "Yes that's interesting, but we do things differently now ... sort of inapplicable. . . ."

Well, I notice that inflation, loss of purchasing power, economic chaos, etc., isn't being created any differently. They manage to keep these actions going at a high roar. So maybe these basics ARE applicable! OH, YES, they are applicable all right-you can bet your house, car, job and future on them.

All right, we had the goldsmith, then we had the banker who issued receipts for deposited goods. Now, we've got a new factor-the governments produce nothing really and yet they print money.

What backs it up? NOTHING! Governments never do produce anything to go into the de-

pository that then backs up the receipts (currency) and that they then can pay back.

So you wonder why there is inflation? Well, it is just the ratio of the amount of money against the goods.

I've already told you that there is a limit on the issuing rate in banking. Anybody that is going for a twelve-to-one ratio (twelve receipts for one unit of goods) has got his neck stuck out. It is going to cost more money for a commodity because there is more money around than commodities.

All right, keeping this in mind look at your tax collector. When they start going up to certain percentages that penalize the company (and worker) and give it an unmanageable burden, and thereby make it difficult to service the machinery, make it difficult to introduce new tools and equipment for a new product, etc., why, the tax man starts putting businesses out of business.

They've been doing that in America and are nearly finished with the job in England. When a company folds that produces shoes, let us say, there is then going to be less shoes on the market and therefore the shoes that remain are going to cost more, again for the same reason as in the previous paragraph-there is more money around than commodities.

Ideally, a company should work itself out of debt, not into it. But because of suppressive, penalizing tax percentages and bank interest rates, a company works itself into debt so one could say that the tax collector is in collusion with the banker in these sectors. This brings about inflation because it is an unproductive 25 or 50 percent of the price of goods. The government is not furnishing anything to account for that. So this now goes back into the banking aspect because the company or the individual can never accumulate enough money to

buy new machines, so the banker has to continuously loan him money to enable him to get his new machinery. But then that's got interest on it so the tax collector.... You see? The guy can never get enough money to buy a new plant, he'd never make enough money. He's either got to get his new plant or his replacement machinery and so forth, either from the bank or just not do it at all with the tax collector.

There is another twist to this. What do governments (and sometimes even banks) do with these tax collections and other pounds of flesh gouged from the carcasses of people trying to get on with their jobs? They hand them out as "foreign aid," the dole, welfare and other activities designed to degrade and subjugate people and kill any initiative and production that might otherwise occur. And the cold, hard, naked truth is that "downstats" don't produce deposited goods.

All of that gets added to the price of commodity and that is what inflation is. Simple. So simple. It's too simple for these idiots not to be able to con everybody in the society into believing that it's very complex. But they don't want the public to understand this because they've got a racket going and they know it's a racket.

They are a goldsmith with a 2000 to 1 receipts to goods ratio and it simply doesn't happen to matter what theory or explanation they dream of. The facts remain. Period. And so do the basics remain. And these basics are very, very much for use by FBOs. FBOs are, after all, banking officers. I've told you that money is a negotiable receipt for deposited goods. Well, what about services? Your orgs sell a lot of them. How does a service fit into this?

A SERVICE IS DEFINED AS AN INCREASE OF USABLE GOODS.

Consider a lawnmower repairman who sits down and someone brings him his broken-down mower and this repairman fixes it. He didn't actually make that lawnmower, but he did increase the number of usable goods in the society because before he fixed it there was one less lawnmower and when he was finished supplying his service there was one more lawnmower. And to this degree, no matter how small it may seem, that lawnmower repairman helped hold down inflation.

In the case of your org, **A SERVICE INCREASES THE USABILITY OF A PERSON.** Students and pcs come to you in one state or condition, you supply them services and they become more useful, more valuable, more productive. This is not a light statement. The more productive people there are in a society, the more goods there will be in a society, and the better off society will be in general. The goldsmith, as a banker, used his basement as a depository. What is the FBO's depository?

SERVICE CAPACITY UTILIZED IS THE DEPOSITORY FOR AN FBO.

It is up to an FBO to increase his depository, his utilized service capacity. And whatever increases his service capacity utilized is the direction the FBO heads in. A bookstore outlet, another bookstore outlet, more auditing rooms, more auditors, more pcs to help fill those auditing rooms, a second HGC, another course room, more Supervisors, more students so the Sups won't be lonely, more Word Clearers, and so on.

The greater the service capacity utilized, the greater the service delivered.

The greater the service delivered, the greater the income. The greater the income, the greater opportunity for this banker (FBO) to loan (invest in FP) for more service capacity. The greater investment in more service capacity,

the greater ability to get more service capacity utilized.

The greater the service capacity utilized, the greater the service delivered.

The greater the service delivered the greater the income....

And on each of these cycles, the FBO and the org get another benefit from this: products delivered out into society and reserves.

You've got the title of Flag Banking Officer

and you've got the tech of banking. So now let's see you use these basics of REAL banking to do what they were invented to do and what they DID DO innumerable times over countless ages-increased production and built empires, yes EMPIRES!

Let it be up to you to apply these basics and then hold up the power trending stat graphs of your org and your reserves and say, "And THAT is banking!"

Freedom

Fixed on too many barriers, man yearns to be free. But launched into total freedom he is purposeless and miserable.

There is freedom amongst the barriers. If the barriers are known and the freedoms are known, there can be life, living, happiness, a game.

**A Special Quote
from the
Volunteer Ministers Handbook
by L. Ron Hubbard**

Exercises One, Two and Three

Exercise One

Look and Act Younger: Sitting somewhere near the center of a room, close your eyes and "contact" the two upper corners of the room behind you. Then, holding those corners, sit still and don't think. Remain interested only in those two corners.

You can do this for two minutes (minimum) or two hours, always with benefit. No matter what happens, simply hold the corners and don't think.

You can do this daily. It will make you look and act younger.

Exercise Two

Feel Freer: Pick out two similar objects. Then find as many differences between them as possible.

Now pick out two objects and see where they are in relation to each other and your body.

Use these two steps over and over. You will feel freer and see better.

Exercise Three

Better your memory: Go over this list many times, each time answering its questions.

"Recall a time which really seems real to you."

"Recall a time when you were in good communication with someone."

"Recall a time when you agreed to something."

"Recall a time when somebody disagreed with you."

"Recall a time when you liked somebody."

"Recall a time when someone agreed with you."

"Recall a time when someone was communicating easily to you." "Recall a time when somebody liked you."

Use this list many times. If "holding corners" (Exercise One) disturbed you, use this list. If you are tired or confused, use it.

This exercises can be done for hours.

The Tone Scale in Full

The Tone Scale

Understanding is composed of Affinity, Reality and Communication. This triangle tells us that the co-existent relationship between affinity, reality and communication is such that none can be increased without a resulting increase in the other two and none can be decreased without decreasing the other two. Of the three, communication is by far the most important. Affinity and reality exist to further communication. Under the heading of affinity we have, for instance, all the varied emotions which go from apathy at 0.1 through grief, fear, anger, antagonism, boredom, enthusiasm, exhilaration and serenity in that order. It is affinity and this rising scale of the characteristics of emotion which give us the Tone Scale.

Scientology 0-8. The Book of Basics

Daily do list from Ron

Here's a brief quote from Professional Auditor's Bulletin (PAB) No. 6, which I offer as a fair use quote for educational purposes:

"Now you happen to be using a body. Before we worry about your mind let's clean up the primary communication relay point, the body. And for two weeks, let's do these things:

1. Clean up your MEST, get done the various odd jobs you've "been meaning to do."
2. Bring yourself up to date socially and give a letter or a ring or a personal call on people you've neglected.
3. Take a one-hour walk every day, simply starting away from home very early (dawn is best) for half an hour and then walk back, a different direction every day. (If you can't walk, get out in the yard and throw things for half an hour. If you can't throw, spit at something for half an hour -- and I mean throw and spit literally.)
4. Get a physical examination and if anything is chronic get it cured.
5. Take twice a day 100 mg. of B1 (200 mg. total) and supplement it with 250 mg. of vitamin C.

If you will do these things, you will be ready in a couple of weeks for some auditing. And if you feel you're in such top condition you need no auditing, I dare you to do the above and feel the change."
